

ΦΒΣ Austin Sigmas Chapter — Website Quick-Reference Guide

How to Add Events, Create Posts & Edit Existing Pages | newsite.psibetasigma1914.org/wp-admin

■ ADDING A NEW EVENT

- 1 Log in at newsite.psibetasigma1914.org/wp-admin
- 2 In the left sidebar click **Events** → **Add New**
- 3 Enter the **Event Title** (e.g. "2026 Annual Golf Tournament")
- 4 Add a **description** in the main content editor — what, why, who it's for
- 5 Set **Start Date/Time** and **End Date/Time** using the date pickers
- 6 Add a **Venue** — click "Or, use an existing venue" to reuse saved locations
- 7 Upload a **Featured Image** (top-right panel) — shows on the events calendar grid
- 8 Click **Publish** — the event appears live on **/events/** automatically

■ **Tip:** Events show on the **/events/** calendar page automatically. No shortcodes needed — The Events Calendar handles display.

■ CREATING A NEWS POST / ANNOUNCEMENT

- 1 In the WordPress sidebar click **Posts** → **Add New**
- 2 Enter a clear **Post Title** (e.g. "Chapter Meeting — June 2026")
- 3 Write your content in the **block editor** — use the + button to add paragraphs, images, headings
- 4 On the right panel, select or create a **Category** (e.g. Announcements, Events, Programs)
- 5 Add **Tags** if relevant (e.g. scholarship, golf, brotherhood)
- 6 Upload a **Featured Image** in the right panel — displays as the post thumbnail
- 7 When ready, click **Publish** — the post appears on the **/news/** page
- 8 To save a draft without publishing, click **Save Draft** instead

■ **Tip:** Use Categories to organize posts. Announcements, Programs, and Chapter News are good starting categories to create under Posts → Categories.

—■ EDITING AN EXISTING PAGE

- 1 In the sidebar go to **Pages** → **All Pages**
- 2 Find the page you want (e.g. "About Us", "Programs", "Contact") and click its title **or** hover and click **Edit**
- 3 The **Gutenberg block editor** opens — click any text block to edit it directly
- 4 To add new content, click the + icon and choose a block: Paragraph, Image, Heading, Columns, Button, etc.
- 5 To move a block, hover it and use the **up/down arrows** or drag the six-dot handle
- 6 To delete a block, click it, then click the **three dots (■)** menu → **Remove Block**

- 7 Click **Update** (top right) to save — changes go live immediately
- 8 To preview before publishing, click the **eye icon** → **Preview in new tab**

■ **Tip:** Never click 'Move to Trash' on a page unless you want to delete it permanently. Use 'Switch to Draft' to hide a page without deleting it.

■ QUICK REFERENCE — WHERE TO FIND THINGS

Task	Where to Go in wp-admin
Add/Edit an Event	Events → Add New or Events → All Events
Write a News Post	Posts → Add New
Edit a Page	Pages → All Pages → click page title
