

AgentHarness v2

AI Chief of Staff Platform · Local-first · 12 Projects · 50+ Agents

 Quick Start Guide

ACTIVATION — 4 STEPS

1 Install Dependencies

In `projects/agentharness-v2/` run:
`npm install` then `cd web && npm install`

2 Build the Web App

From the `web/` folder:
`npm run build` → outputs to `web/dist/`

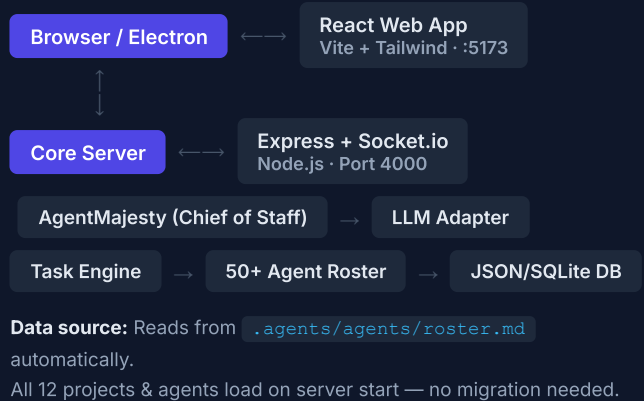

3 Start the Server

Browser: `npm run core` → `localhost:4000`
Desktop: `npm run electron`
Dev mode: `npm run dev` (hot reload)

4 Configure AI Provider

Open `localhost:4000` → Settings → AI Provider
Select Ollama, OpenAI, Anthropic, or GitHub Models

ARCHITECTURE

Command (Chat)

ChatGPT-style interface with AgentMajesty as your AI chief of staff. Streaming responses, conversation history, and project-scoped context switching.

Projects & Teams

All 12 project teams auto-populate from roster.md. View lead agents, specialists, and team status. Browse Finance, Solar, Social Media, Ministry & more.

Todos & Tasks

AgentMajesty auto-populates the todo list while executing requests. Manual creation also supported. Task queue shows live agent execution status.

AI PROVIDERS

Ollama (Local)

Run `ollama pull llama3.2`.
Free, private, no API key needed.

OpenAI

GPT-4o / GPT-4-turbo.
Key from `platform.openai.com`

Anthropic

Claude 3.5 Sonnet.
Key from `console.anthropic.com`

GitHub Models

Use your GitHub PAT.
Free tier available.

TIPS & REMOTE ACCESS

Enable Remote Web Access

Run `node setup-tunnel.js` to configure a Cloudflare Tunnel — access AgentHarness securely from any device over HTTPS.

Run as Background Service

Install PM2: `npm install -g pm2`
Then: `pm2 start core/server.js --name agentharness && pm2 save`

Sync Roster Anytime

Click **Sync Roster** in the Projects tab to reload all 12 teams and agents from `roster.md` without restarting.
